

Environmental policy of Rosseti South, PJSC

Rosseti South, PJSC is a modern energy company focused on achieving high levels of environmental safety of the production complex and balanced solutions to its own economic problems. The main objective of Rosseti South, PJSC in the field of environmental protection is to ensure a safe level of negative impact on natural objects and the rational use of natural resources. The environmental policy of Rosseti South, PJSC is based on the international obligations of the Russian Federation in the field of environmental protection, the Constitution of the Russian Federation, federal laws and other regulatory legal acts of the Russian Federation.

Principles of the Environmental policy of Rosseti South, PJSC:

- the priority of environmental safety in the limits of production activities, decision-making taking into account the needs and expectations of concerned parties and the scope of the environmental management system;
- prevention of emergency situations leading to negative environmental consequences;
- openness and accessibility of information on environmental activities;
- improvement of activities and continuous improvement of the main production processes.

The main directions of environmental policy implementation:

- knowledge and understanding, timely exposure to risks and the use of opportunities, the source of which are external and internal factors that can affect the effectiveness of the environmental management system;
- fulfillment of the mandatory requirements of interested parties due to the need to comply with the environmental legislation of the Russian Federation, the obligations assumed and satisfaction of their reasonable expectations, including by the Company's contractors in the process of design, construction, reconstruction and technical re-equipment;
- analysis of changes in the legislation of the Russian Federation in the field of environmental protection and timely development of appropriate management decisions;
- technological re-equipment, introduction of new technologies, gradual decommissioning of outdated equipment;
- ensuring compliance of the company's environmental management system with the requirements of the ISO 14001 standard (performance) and its continuous improvement;
- fulfillment of all obligations approved.

The top management of ROSSETI South, PJSC assumes responsibility for ensuring its understanding and implementation by all employees, the implementation of the provisions of this policy, the effective operation of the Company's environmental management system and its continuous improvement.
